Tony Mineart and I had just finished cutting the runway and were sitting in the hangar having a little hangar talk when we heard a familiar sound. It was a helicopter in the area. We thought it might be Fred Lansing flying in to say hello but instead, a new face showed up. Tom Lueck was the pilot and was practicing hovering. We hoped they would stop but said they had to get back to Cedar Rapids.

While cutting grass, visitor came in and practiced landings with a “tail dragger”. We just pulled off to the side and enjoyed the show.

Run-away mower starts to remodel the pilot lounge

The large 15 foot cut mower is a tricky machine to operate and has caused problems in the past. When putting it away, before it could be stopped, it had gone through the back wall (garage door) and parked its self-inside the lounge. I guess it was tired of sitting outside in the shelter. We were going to add an indoor bathroom in that area but this would be starting too soon. Thanks for the help of Fred

Lansing, we were able to get the lounge closed. Now for the clean up and replacing the insulation behind the door.

Dubuque EAA 327 will meet at the Dyersville

On June 20, the Dubuque Chapter of the EAA will have their meeting at the Dyersville Airport. Planes and cars with people will be arriving about 1:00 p.m. and spend the afternoon. There will be meat to grill, plates, utensils and beverage supplied by the chapter. Attendees should bring a dish to pass. All pilots in our area are invited. We are hoping to have pilots from Manchester, Monticello and Dubuque attend.

Aviation 101

Things which do you no good in aviation: Altitude above you. Runway behind you. Fuel in the truck. Half a second ago. Approach plates in the car. The airspeed you don't have.

Speed is life, altitude is life insurance. No one has ever collided with the sky.

Events Calendar 2015
