Airport and property in the process of being purchased

The black outline on the photo is the property the supporters of the airport are buying. This includes the runway and side slope on the right and the corn land west of the small pond on the left. Our intentions are to fill in the small pond to make room for hangars. The corn ground will be rented out until we need the land for expansion.

If anyone is interested in being part of the ownership of the airport feel free to call Dave Kramer, 563 875-8590. We have a power point explaining the set up and the costs involved.

We are in contact with instructors and a mechanic that would want to practice their profession on a part time basis at the Dyersville Airport. We will be marketing the airport to bring in business and tourism to the area. We also have the state DOT involved for future development and suggestions to make the airport a more valuable asset for the community. We are in touch with others airport managers and supporters around the state of Iowa. Our goal is to keep Dyersville on the airway road map of the United States.

It's going to be an exciting future.

The recreational flying season is about to begin and pilots are ready to go.

Places to fly

April 2	Greenfield Airport (GFZ)	Museum Chilli fly-in	11 – 2

If you fly to Watertown, they have the Hamburger Social just about every Thursday. Check Wisconsin Flight Events.

For up to date activities, check the calendar on our website. www.dyersvilleairport.com

Captain's wife has been selecting the stewardesses again !!

This photo was taken in 2007. Notice Kortenkamp, the convent and all the homes in the outline and South (left) of the line have all been removed.

Iowa DOT came to help Dyersville Airport

Mike Marr, Shane Wright and Bill Burger are pictured here. Mike and Shane came to the airport to make suggestion on how to improve and develop the airport. Mike's job is to inspect and approve all the airports in Iowa. Everything is fine at the Dyersville airport but he gave suggestion on how to improve and keep the safety of pilots in the forefront in our future progress. Bill will help with the surveying to have the right distance and elevation of future construction of hangars and structure to be built in the future.
